

Libido Complex: **Maximum Testosterone**[®]

Testosterone Enhancer

The All-Natural Formula for Men that Enhances Sexual Performance!*

- Boosts production of male hormones
- Nourishes the reproductive system
- Maximizes sexual response and performance

Testosterone[®], the premiere high-performance male sexual enhancement formula from Maximum International has been a bestseller since its introduction in 1999. Testosterone contains a proprietary blend of natural herbs, amino acids, and high-potency extracts that has provided thousands of loyal customers a natural alternative to prescription erectile dysfunction (ED) drugs.

Used prior to sexual activity, Testosterone[®] helps to stimulate blood flow to the genital area, which in turn helps men to achieve harder, longer lasting erections. Taken as a daily supplement, it has been shown to boost the secretion of male hormones and strengthen the reproductive system. Because Testosterone[®] promotes the delivery of hormone-rich blood to the genital area, regular users have even reported an increase in penis size.

UPC: 8-00326-10016-9
 Item#: MSTH-10015
 Size: 60 Veggie Capsules
 Bottle dim: 2 1/8 x 2 1/8 x 5 1/16"
 Bottles per case: 12
 Case dim: 7 x 6 1/4 x 9 1/4"
 Weight per case: 2.0 lbs
 MSRP: \$39.99

Supplement Facts

Serving Size: 2 Capsules		Per Container: 30	
	Amount per serving	%DV	
Niacin (as niacinamide)	45 mg	225%	
Zinc (as zinc oxide)	10 mg	67%	
Proprietary Blend	847 mg	**	
Horny Goat (Epimedium sagittatum)(weed) (standardized to 10% total icarins)			**
Maca (Lepidium meyenii)(root)			**
Guarana (Paulinia cupana)(seed) (standardized to 22% caffeine)			**
Korean Ginseng (root)			**
L-Arginine			**
Muiru Puama (Ptychopetalum olacoides)(herb)			**
Longjack extract (Eurycoma longifolia)(herb)			**
Avena Sativa extract			**
Orchic powder			**
Yohimbe (Pausinystalia yohimbe)(bark) (standardized to 24% ginkgo flavone glycosides)			**
Ginkgo Biloba (leaf) (standardized to 24% ginkgo flavone glycosides)			**
Saw Palmetto (Serena repens)(fruit)			**
Xanthoparmelia Scabrosa			**
Cnidium Monnier			**
GABA (gamma amino butyric acid)			**
Royal Jelly			**
Damiana (Turnera diffusa)(leaf)			**

Unlike synthetic ED drugs that have an artificial and temporary effect along with the potential of dangerous side effects, Testosterone's highly effective ingredients work *with* the body to enhance male sexual performance and provide a healthy, natural response.

Passion Herbs: Testosterone® contains a blend of 12 carefully selected herbs, each with a long history of providing enhanced sexual performance. In many cultures, these herbs are highly prized as being the cornerstone for a man's "long youth" and *virility* by helping him remain physically fit, mentally alert, and sexually active well into old age. Thanks to modern science we now know the secrets behind the amazing sexual benefits of "passion herbs".

Independent research has shown these natural ingredients either alone or in combination:

- Naturally boost the production of testosterone
- Trigger the release of other steroidal hormones that have a fast-acting restorative effect on reproductive glands
- Expand blood vessels, allowing hormone-enriched blood to reach the penis
- Nourish the reproductive system with natural substances that enhance fertility
- Improve energy levels and immunity by supplying healthy phytonutrients
- Allow for sustained erections
- Promote a healthier prostate gland
- Support the neurotransmitters responsible for sexual arousal

Sexy Amino Acids: Amino acids are the building blocks of protein, and protein provides the structure of all living things. There are 20 amino acids in the human body and each one has a specific biological function. Testosterone® contains two "sexy" amino acids, GABA and arginine.

The amino acid GABA (gamma-aminobutyric acid) is also a neurotransmitter that induces relaxation and enhances secretion of human growth hormone (HGH). HGH in turn boosts energy, increases lean body mass, promotes fat loss, and enhances the release of testosterone.

Arginine has long been known as a sexual stimulant but it wasn't until 1998 that it was clearly understood why. Researchers found that arginine is required for the production of nitric oxide, a signaling chemical gas that relaxes and dilates blood vessels improving blood flow to the penis for a longer lasting erection. Arginine has also been shown to promote the release of HGH.

Nourishing the Reproductive System: Royal Jelly, a secretion of honey bees is the only food of the queen bee, allowing her to live 24 times longer than worker bees. Royal Jelly's rich mixture of nutrients including aspartic acid promotes hormone balance and the regeneration and growth of tissue. Niacin is a B vitamin necessary for a healthy circulatory and nervous system. Because it is a potent blood vessel dilator, niacin increases blood flow to the genital area, improving erectile function. The highest concentration of the mineral zinc in males is found in the prostate gland and its fluid. It is necessary to maintain normal testosterone levels, sperm count, and motility. The combined effects of zinc are believed to not only to increase sex drive, but also to improve potency.

Satisfied Customers: Maximum Testosterone® is one of the most popular sexual enhancement formulas available for men. Countless testimonials from satisfied customers attest to its highly regarded reputation for addressing the needs of men who prefer a safe natural product to maximize their sexual experience. Formulated with time-tested ingredients that work with the body, Testosterone® is the smart choice to enhance male performance and libido.
